SSLCertificateChainFile /path/to/DigiCertCA.crt
```

```
sudo systemctl restart apache2
```

```
service apache2 restart
```

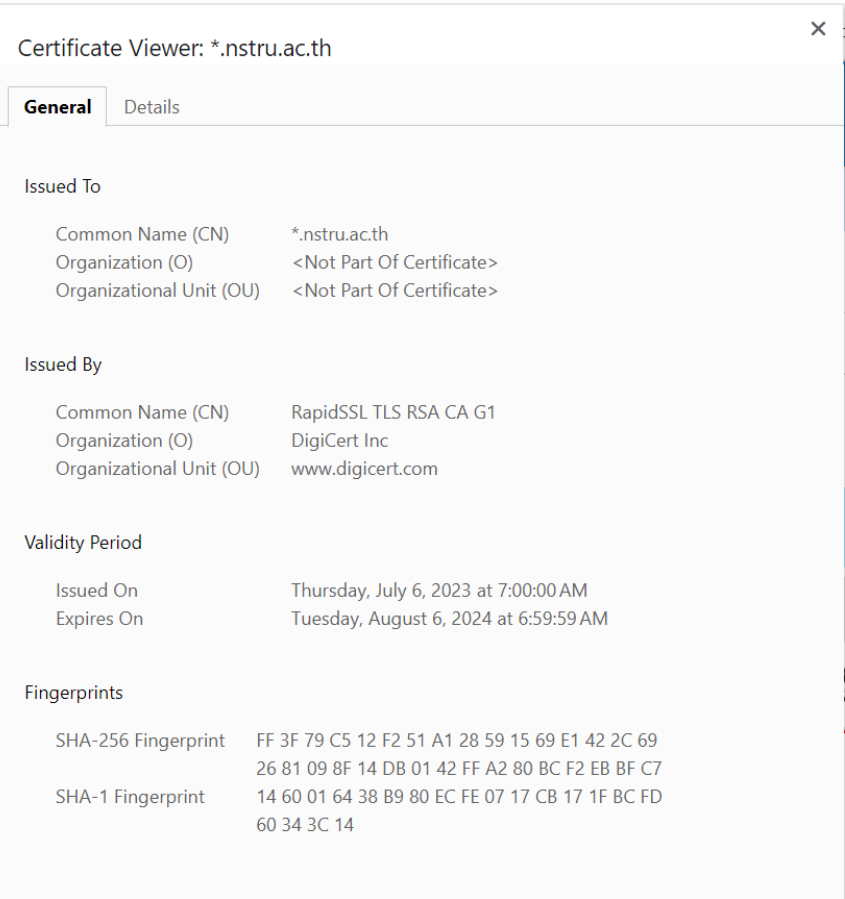

SSL

1. Open a web browser (e.g., Chrome) and navigate to the URL of the website you want to secure (e.g., `nstru.ac.th`).

2. Click on the lock icon in the address bar to view the certificate details.

3. Click on the 'Details' tab to view the certificate information.
